Description

```
$(document).on('click', '.update', function() {
  var user_id = $(this).attr("id");
  $.ajax({
    url: "fetch_single.php",
    method: "POST",
    data: {
      user_id: user_id
    },
    dataType: "json",
    success: function(data) {
      $('#userModal').modal('show');
      $('#name').val(data.name);
      $('#status_id').val(data.status_id);
      $('#note').val(data.note);
      $('#note_tow').val(data.note_tow);
      $('#note2').val(data.note2);
      $('#note3').val(data.note3);
      $('#payment').val(data.payment);
      $('#ntg_no').val(data.ntg_no);
      $('.modal-title').text("□□□□□ □□□□□□");
      $('#user_id').val(user_id);
      $('#action').val("Edit");
      $('#operation').val("Edit");

      if ($("#note").val() !== "") {
        $("#note").prop("disabled", true);
      } else {
        $("#note").prop("disabled", false);
      }
    }
  });
});
```

I am using a JQuery model form with Ajax to allow users to enter new values and update in text area I put condition statement depend on field value NULL OR NOT NULL after success but when update any field the condition field(note) lost data
