Redmine - Defect #34283

Text in code / preformatted blocks renders incorrrectly in Issue List

2020-11-18 10:23 - Andrew Mo

Status:	New		Start date:	
Priority:	Normal		Due date:	
Assignee:			% Done:	0%
Category:	Issues list		Estimated time:	0.00 hour
Target version:				
Resolution:			Affected version:	4.1.1

Description

Code / preformatted text within (for example) the Description renders correctly on the Issue Detail screen, but not when the Description field is displayed on the Issue list screen. Problem occurs with both Markdown & Textile on both my own test installation *as well as* Redmine.org.

For example the following will be incorrectly displayed in the Issue List on one line:

```
line 1
   Indented line 2
      Further indented line 3
   Indented line 4
Line 5
```

And the following code block from the Redmine Textile Guide will display each word of code on its own line:

```
# The Greeter class - Ruby
class Greeter
  def initialize(name)
    @name = name.capitalize
  end

  def salute
    puts "Hello #{@name}!"
  end
end
```

A screenshot of how it renders in my Issue List is attached. The first example looks like a CSS problem. This is using Textile and the Default theme.

My Environment:
Redmine version 4.1.1.stable
Ruby version 2.5.1-p57 (2018-03-29) [x86_64-linux-gnu]
Rails version 5.2.4.2
Environment production
Database adapter PostgreSQL
Mailer queue ActiveJob::QueueAdapters::AsyncAdapter
Mailer delivery smtp

SCM:
Mercurial 4.5.3
Git 2.17.1

Filesystem
Redmine plugins:
redmine_env_auth 1.1
redmine_language_change 0.1.0
redmine_wiki_lists 0.0.9

So I've confirmed it also renders wrongly on Redmine.org, though the code example renders differently to our test site. Attached is how it looks in the Issues List on Redmine.org

Could you post the URL of redmine.org? I could not find the page that rendered incorrectly on www.redmine.org.

#3 - 2020-12-14 09:51 - Andrew Mo

Sorry, completely missed the notification. This very Issue will render incorrectly in the Issue List. Here's a link to demonstrate it:

https://www.redmine.org/projects/redmine/issues?utf8=%E2%9C%93&set_filter=1&f%5B%5D=status_id&op%5Bstatus_id%5D=o&f%5B%5D=subject&op%5Bsubject%5D=%7E&v%5Bsubject%5D%5B%5D=Text+in+code&f%5B%5D=&c%5B%5D=tracker&c%5B%5D=status&c%5B%5D=subject&c%5B%5D=updated_on&c%5B%5D=category&group_by=&c%5B%5D=description

Compare the result with the layout on this Issue Detail screen:

#4 - 2020-12-20 10:04 - Go MAEDA

- Category changed from Text formatting to Issues list
