Description			
<p>The "以内" used in less_than_x_seconds etc. means "within" instead of "less than". This has also been fixed in the i18n repository and I don't think it's appropriate. https://github.com/svenfuchs/rails-i18n/issues/374</p> <p>We suggest replacing it with "未満" which means "less than" in Japanese.</p> <p>Example where this word is used: ScreenShot_2020-12-15_14.00.39.png</p>

- Target version set to 4.2.0

LGTM.

"以内", the current Japanese translation for "less than", is incorrect because "以内" means "less than or equal". The suggested new translation "未満" is a very common word to express "less than" in Japanese.
