

Redmine - Defect #34473

Displaying the table of content on the right causes wrong position

2020-12-18 11:42 - César DJ Caësar 9114

Status:	Confirmed	Start date:	
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	UI	Estimated time:	0.00 hour
Target version:		Affected version:	3.4.13
Resolution:			
<b>Description</b> Hi everyone, I installed the latest version of Redmine and I started to try the wiki. I wrote a simple page with titles ans subtitles, and at the very beginning of the page I put:  <code>{{&gt;toc}}</code>  to get the table of content on the top right corner.  Actually as you can see the result is quite disturbing because I would have expected to get the TOC under "Modifier Surveiller".  I think it may be a UI bug.			

History

#1 - 2020-12-19 10:02 - Go MAEDA

- File 34473.png added
- Status changed from New to Confirmed
- Affected version changed from 4.1.1 to 3.4.13

I have confirmed the issue with Redmine 3.4, 4.0, and 4.1. It occurs when "{{>toc}}" is placed at the first line.

You can avoid the issue by placing "{{>toc}}" after the first heading instead of the first line.
