Target version:			
Description			
<p>This is a series of patches that includes cleanups, fixes and improvements after the Wiki tab was removed from the project settings per #26579:</p> <ul style="list-style-type: none">• 1. Remove 'edit' action from :manage_wiki permission definition in Redmine::AccessControl. Wikis#edit is removed by r17018.• 2. Redirect_to project_path after WikisController#destroy.<ul style="list-style-type: none">◦ Project settings 'wiki' tab is removed by r16917 & r17017.◦ This action is executed outside the project settings scope after r16916, thus we can better redirect to project_path.• 3. Set :wiki menu_item for WikisController#destroy. This action is executed inside the project wiki scope after r16916, thus we can better set the menu_item accordingly.• 4. Disable the wiki module after deletion of a project wiki. By adding a (private) after_destroy :disable_wiki_module callback that disables the wiki module after deletion of a project wiki, we prevent the need to explicitly have to disable the wiki module first, before (re-)enabling the module would eventually create a new project wiki and reset the start_page.<ul style="list-style-type: none">◦ This fixes issue #34634.• 5. Changed wiki :start_page name to l18n'ed :field_start_page within EnabledModule#module_enabled. This prevents a default 'projectid/wiki/Wiki' URL for the project wiki start page. The test assertion is updated to reflect this change and the containing test is adjusted to handle the l18n'ed text. Code formatting is adjusted whenever code was touched anyways. <p>This patch series, against source:/trunk@20729, is produced using git format-patch which makes it apply-able using "patch -p1 < 0001-...".</p>

History

#1 - 2021-01-27 10:01 - Mischa The Evil

- Follows Feature #26579: Project settings : remove Wiki tab added

#2 - 2021-01-27 10:02 - Mischa The Evil

- Related to Defect #34634: Deletion of project wiki leaves the project wiki inaccessible (404) until module reactivation added

#3 - 2021-02-03 15:12 - Go MAEDA

Thank you for posting the patch. I have tried out the patches and confirmed the first four patches fix existing issues.

However, I am afraid the change by attachment:0005-Changed-wiki-start_page-name-to-l18n-ed-field_start_.patch is sometimes confusing. Assume the following situation.

1. Create the first Wiki page on a project. The page title will be "Start page"
2. Create a new page with the title "Foo"
3. Set the page "Foo" as a start page

Even after changing the start page to "Foo", the first page's title is still "Start page" despite the page is no longer a start page. Despite a page with the name "Start page" exists, the link "Start page" in the sidebar points to "Foo" page instead of "Start page". I think it is confusing.

#4 - 2021-02-03 15:21 - Go MAEDA

How about committing the first four patches first, and discussing the fifth patch as a separate issue?

#5 - 2021-04-13 07:17 - Mischa The Evil

- Subject changed from *Cleanups, fixes and improvements after Wiki tab removal from project settings (#26579)* to *Cleanups and fixes after Wiki tab removal from project settings (#26579)*

Go MAEDA wrote:

How about committing the first four patches first, and discussing the fifth patch as a separate issue?

Sorry for the delayed response. I agree with you. I should have separated them in the first place as their changes are unrelated. FWIW: I'd also be ok with dropping the fifth patch altogether early at the gate, given the possible confusion and the severity of the "issue".

#6 - 2021-04-21 10:43 - Go MAEDA

- Target version set to Candidate for next major release

#7 - 2021-05-12 16:52 - Go MAEDA

- Target version changed from Candidate for next major release to 4.2.2

Setting the target version to 4.2.2.

#8 - 2021-05-30 23:36 - Marius BĂLTEANU

Should we add a message to the delete confirmation message to inform the user that deleting the root wiki will disable the module?

#9 - 2021-07-26 23:23 - Marius BĂLTEANU

- Copied to Patch #35610: Cleanups after Wiki tab removal from project settings (#26579) added

#10 - 2021-07-26 23:34 - Marius BĂLTEANU

- Status changed from New to Closed

- Target version deleted (4.2.2)

I've committed first 3 patches as part of [#35610](#) for Redmine [5.0.0](#).

Regarding point 4, we can continue the discussions in [#34634](#) which is now assigned to [5.0.0](#).

Thanks Mischa The Evil for providing the patches.
