History

#1 - 2021-01-28 20:38 - Holger Just

- Status changed from New to Needs feedback

Thank you for your patch.

Could you please describe (possibly along with a screenshot) what specific problem you are attempting to fix with your patch? Where does the problem occur exactly? Does it occur with all browsers?

#2 - 2021-01-29 06:37 - Bernhard Rohloff

- File *clipped_button.png* added
- Assignee set to Bernhard Rohloff

The general height property for inputs seems to break the button of input fields with the type 'file' on Firefox.

clipped_button.png

I'll test the patch today and report my results.

- Status changed from Needs feedback to Closed
- Assignee deleted (Bernhard Rohloff)

This issue was fixed by #33563 for version version:4.1.2 and above about 6 month ago. Anyway thank you very much for your patch.
I'll close this issue by now.

BTW if all things are going well, v4.1.2 will be released in about a week from now.
