Redmine - Defect #34894
User link using @ not working at the end of line

2021-03-15 13:56 - Dmitry Makurin

Status:	Closed		**Start date:**	
Priority:	Normal		**Due date:**	
Assignee:	Go MAEDA		**% Done:**	0%
Category:	Text formatting		**Estimated time:**	0.00 hour
Target version:	4.1.3			
Resolution:	Fixed		**Affected version:**	4.1.0

Description

Redmine fails to parse mention like @jsmith. (with dot at the end)

At source:trunk/app/helpers/application_helper.rb#L1286 regex extracts full line with all extra sybmols like _-@. and thus can't fide a user with that login.

It only affects separator @, user:jsmith. or user#2. works fine.

Small patch with fix and test in attachment.

Dmitry, thanks for reporting and fixing this issue, it looks good to me with one mention: we don't need a new test for this case, it's enough to add this case at the existing test.

The patch passes all the tests: https://gitlab.com/redmine-org/redmine/-/pipelines/284519558

Just wanted to show the difference between other regexs in same situation. Initially only @ was a problem.
