### Description

Hi, previously I used the following code to center an image:

```
p=. !image.png!
```

and it worked.

But after the upgrade to trunk version (rev 2791) the image is not displayed and the following text appears centered:

```
!/attachments/download/19!
```

It doesn't occur if I write nothing before the image:

```
!image.png!
```

but then the image appears in the left :(

### History

#### #1 - 2009-06-16 23:15 - Mischa The Evil

I can confirm this behaviour. It *works* in the following case:

```
p=. Before !image.png! after
```

#### #2 - 2009-06-25 16:24 - Mike Powers

I have the same issue in 0.8.4.stable.2784

A suitable workaround is to insert a hard return after the centering command.

```
p=.  
!image.png!
```

This will properly display the centered image.

**#3 - 2009-10-14 15:17 - Mike Bolser**

This bug appears to have resurfaced. However, if I put a leading and trailing space around the image, it appears to work fine.

p=. !image\_url!

**#4 - 2009-11-11 23:30 - Jean-Philippe Lang**

- *Status changed from New to Closed*

- *Resolution set to Fixed*

Fixed in r2999, now including tests for this.
