

## Redmine - Defect #34998

### Cannot open journal dropdown menu after editing note

2021-04-01 02:09 - Mizuki ISHIKAWA

<b>Status:</b>	Closed	<b>Start date:</b>	
<b>Priority:</b>	Normal	<b>Due date:</b>	
<b>Assignee:</b>	Go MAEDA	<b>% Done:</b>	0%
<b>Category:</b>	UI	<b>Estimated time:</b>	0.00 hour
<b>Target version:</b>	4.2.1	<b>Affected version:</b>	4.2.0
<b>Resolution:</b>	Fixed		
<b>Description</b>			
<p>After rewriting the journal note, clicking the journal dropdown does not open the menu. Reloading will fix the menu to open. screenshot-2021-04-01-9.00.30.png</p> <p>Updating the journal note runs the following code to redraw the journal actions. The problem is that the .drdn-trigger click event is not set in the dropdown that was redrawn at that time.</p> <pre>// https://www.redmine.org/projects/redmine/repository/revisions/20875/entry/trunk/app/views/journals/update.js.erb#L5 \$("#change-&lt;%= @journal.id %&gt; .journal-actions").html('&lt;%= escape_javascript(render_journal_actions(@journal.issue, @journal, :reply_links =&gt; authorize_for('issues', 'edit')) %&gt;');</pre> <p>Related to #34714.</p>			

#### Associated revisions

##### Revision 20917 - 2021-04-06 07:46 - Go MAEDA

Cannot open journal dropdown menu after editing note (#34998).

Patch by Mizuki ISHIKAWA.

##### Revision 20918 - 2021-04-06 07:48 - Go MAEDA

Merged r20917 from trunk to 4.2-stable (#34998).

#### History

##### #1 - 2021-04-01 03:31 - Mizuki ISHIKAWA

The following changes will resolve the issue.

```

  drdn.removeClass("expanded");  
}
```

## #2 - 2021-04-01 07:21 - Marius BALTEANU

Mizuki, one question, why not binding directly on document?

## #3 - 2021-04-01 07:21 - Marius BALTEANU

- Target version set to 4.2.1

## #4 - 2021-04-06 02:04 - Mizuki ISHIKAWA

Marius BALTEANU wrote:

I used "#content, #header" because I thought it was better to narrow down the selector as much as possible.

However, since \$("#content, #header") contains almost all elements of Redmine, I think it makes no difference to change \$("#content, #header") to \$(document).
