Description

Supported database engines and versions were not been updated for a while and we should do it in Redmine [6.0.0](#).

Redmine version	Supported Ruby versions	Rails version used	Recommended Databases			
			PostgreSQL	MySQL	MSSQL	SQLite
trunk (>= r22053)	2.7, 3.0, 3.1, 3.2	Rails 6.1	14	8.0 - 8.1	>2012	3
5.1	2.7, 3.0, 3.1, 3.2	Rails 6.1	>9.2	5.7 - 8.1	>2012	3
5.0	Ruby 2.5 ¹ , 2.6 ¹ , 2.7, 3.0, 3.1	Rails 6.1	>9.2	5.7 - 5.7	>2012	3
4.2	Ruby 2.4 ¹ , 2.5 ¹ , 2.6, 2.7 ²	Rails 5.2	>9.2	5.5 - 5.7	>2012	3

History

[Tests pass](#) on MySQL 8, but `issue_nested_set_concurrency_test` still fails:

```
redmine git:(feature/postgresql-13) ruby test/unit/issue_nested_set_concurrency_test.rb
Run options: --seed 4055
```

```
# Running:
```

```
.F
```

Failure:

```
IssueNestedSetConcurrencyTest#test_concurrency [test/unit/issue_nested_set_concurrency_test.rb:48]:
Expected "Mysql2::Error: Deadlock found when trying to get lock; try restarting transaction" to be nil.
```

```
rails test test/unit/issue_nested_set_concurrency_test.rb:41
```

Anyway, considering that MySQL 5.7 is used on CI, my proposal regarding to MySQL is to update the documentation and mention that we test Redmine against MySQL 5.7 ([#17460](#)) and 8 and drop MySQL 5.5 ([#30419](#)) and MySQL 5.6.

What do you think?

I propose to merge the **Ruby interpreter** and **Supported database back-ends** from [RedmineInstall](#) in a table like the one from the description and have all the importance notices under it, including footnotes.

Also, I think we should a column with end of support for each Redmine version.

What do you think?

P.S. The table is update based on the changes made by Jean-Philippe on [Continuous integration](#) matrix.
