Description

Attached you may find latest updates to German localization.
Thanks for considering my patch!

During my translation work, I came across two quirks in en.yml that I would like to report:

A)

notice_invalid_watcher: "Invalid watcher: User will not receive any notifications because it does not have access to view this object."

I think the term permission is more appropriate than access here.

Proposal: "Invalid watcher: User will not receive any notifications because **he** does not have **permission** to view this object."

B)

error_attachments_too_many: "This file cannot be uploaded because it exceeds the maximum number of files that can be attached simultaneously (#{max_number_of_files})"

I think the passive form is more appropriate here:

Proposal: "This file cannot be uploaded because the maximum number of files that can be attached simultaneously (#{max_number_of_files}) **was exceeded**".

Overall the translation is very good. I only found one small mistake while reviewing the patch.

notice_invalid_watcher: 'Ungültiger Beobachter: Benutzer wird keine Benachrichtigungen erhalten,
da er keine über keine Leseberechtigung für dieses Objekt verfügt.'

... should be corrected to ...

notice_invalid_watcher: 'Ungültiger Beobachter: Benutzer wird keine Benachrichtigungen erhalten,
da er keine über keine Leseberechtigung für dieses Objekt verfügt.'

I attach a fixed version of Andreas' patch.
