

Redmine - Patch #35081

Update config/environments/*.rb for Rails 6.1

2021-04-13 04:21 - Go MAEDA

Status:	Closed	Start date:	
Priority:	Normal	Due date:	
Assignee:	Go MAEDA	% Done:	0%
Category:	Rails support	Estimated time:	0.00 hour
Target version:	5.0.0		
Description The attached patch updates Rails environment files (development.rb, production.rb, and test.rb in config/environments directory) for Rails 6.1. By updating the files, several useful new features in Rails 6.1 will be available (e.g. request_id in production.log, verbose_query_logs in development.log). Also, by looking at the commented out settings, the user can easily know what settings are available (e.g. config.force_ssl in config/environments/production.rb).

The patch adds two settings in config/environments/production.rb which are already defined in config/application.rb with the same value:

- config.log_level = :info already defined in [source:/trunk/config/application.rb#L77](#)
- config.i18n.fallbacks = true already defined in [source:/trunk/config/application.rb#L57](#)

Also, even commented, I don't think that we should settings add which are not working in the current context, for example, enabling config.assets.css_compressor = :sass it will break Redmine (at least in my local environment).

The patch adds two settings in config/environments/production.rb which are already defined in config/application.rb with the same value:

- config.log_level = :info already defined in [source:/trunk/config/application.rb#L77](#)
- config.i18n.fallbacks = true already defined in [source:/trunk/config/application.rb#L57](#)

Fixed.

Also, even commented, I don't think that we should settings add which are not working in the current context, for example, enabling config.assets.css_compressor = :sass it will break Redmine (at least in my local environment).

I checked through configs in the files and removed config.assets.* in config/environments/development.rb and config/environments/production.rb.

Thank you for reviewing the patch.

#5 - 2021-12-30 03:45 - Go MAEDA
- Target version set to 5.0.0

Setting the target version to 5.0.0.

#6 - 2022-01-03 03:30 - Go MAEDA
- Status changed from New to Closed
- Assignee set to Go MAEDA

Committed the patches.
