

Redmine - Defect #35087

Users without two-factor authentication enabled cannot sign out when two-factor authentication is required

2021-04-14 04:25 - Go MAEDA

Status:	Closed	Start date:	
Priority:	Normal	Due date:	
Assignee:	Go MAEDA	% Done:	0%
Category:	Accounts / authentication	Estimated time:	0.00 hour
Target version:	4.2.1	Affected version:	
Resolution:	Fixed		
Description			
<p>The issue was originally reported in #35086.</p> <p>Suppose a Redmine instance that projects are public and can be accessed without authentication. You were logged in to Redmine, and one day the admin set two-factor authentication to be required.</p> <p>But suppose that you want to access the Redmine as an anonymous user without enabling two-factor authentication. So you will try to sign out, but when you click the "Sign out" link, you will get a page asking you to enable two-factor authentication and you cannot sign out. Therefore, the only way for you to access the Redmine as an anonymous user is to delete a cookie or use a different browser.</p>
