

Redmine - Defect #35102

Issue Tracking Details are showing issue statuses even if they are not used within the project

2021-04-15 11:02 - Pan Tau

Status:	New	Start date:	
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:		Estimated time:	0.00 hour
Target version:		Affected version:	4.2.0
Resolution:			
Description			
<p>The Issue Tracking Details show all issue statuses of all trackers used in the project, even if no project-role uses them in their workflow.</p> <p>That becomes an problem if have many projects using for example the tracker "Defect" and some of the projects have additional issue statuses.</p> <p>Because you get an really long table und header and most of the statuses are not used within the project.</p> <p>It would be helpful to filter the shown statuses by project-trackers and their project-role-workflows.</p> <p>many_not_used_issue_statuses.png</p>
