Redmine - Defect #35141

Irrelevant groups in "Add watchers" list

2021-04-21 16:01 - Yuriy Millen

Status: Confirmed Start date: **Priority:** Due date: Normal Assignee: % Done: 0% Category: Issues permissions **Estimated time:** 0.00 hour Target version: Resolution: Affected version: 4.2.0

Description

Redmine 4.2 introduced an ability to add groups to watchers list.

The logic prior was that in the "Add watchers" list appeared only users, who have access to a particular tracker. However, this logic is ignored for groups - it is possible to add any group regardless of a whether this group was access to the tracker or not.

History

#1 - 2022-01-18 03:00 - Go MAEDA

- Status changed from New to Confirmed

I have confirmed the issue. The following steps can reproduce the issue.

- 1. Add a group as a member of a project
- 2. Navigate to Administration > Roles and click "Edit" of the group's role
- 3. Scroll down to "Issue tracking" on the edit page of the role
- 4. Remove all permissions for all trackers
- 5. Back to the project's page and try to add watchers of an issue. You should not be able to add the group as a watcher but you can
