Target version:	
Resolution:	
Description	
<p>Hi,</p> <p>The "Assign to me" (#29285) feature is very nice and i believe another shortcut would be beneficial.</p> <p>On our team , issues are being assigned form person A to person B and sometimes there is a lot of "ping pong" between person A and person B.</p> <p>Person A assigns the issue to person B with comments. Person B adds his comments and assigns to issue to Person A. Person A sees the comments and adds is own and assigns the issue to Person B.</p> <p>If we'll have a "Assign to Previous Assignee" shortcut , it would saves us few clicks and manual user lookup from the drop down (we got 25+ users/groups on the list).</p> <p>Thnaks in advance.</p>
