<b>Description</b> Well i would appreciate it, if i could control the permissions, especially for the users which are not logged in (especially view).  for Example.  Some Wikisites in the Project might be only for the developers. Right now, all useres have read write access to the wiki, even ones which are not logged in. BTW i would prefer a wiki where authors have to register or use a guest account.  Also some documents might be for internal use only.  Cause of this it is important, to get more control for this areas.	

### History

#### #1 - 2007-07-31 18:34 - Jean-Philippe Lang

Will be implemented in 0.6.0

#### #2 - 2007-08-31 12:42 - Jean-Philippe Lang

As of rev 674, you can disable these permissions for any role:

- View documents
- Edit wiki pages
