Description	
The task list extensions will be a very nice addition for Common Mark text formatting. https://github.com/gjtorikian/commonmarker#extensions

- File 0001-Enable-task-list-for-CommonMark-Markdown-formater-35.patch added

I'm adding a patch for testing purposes, I still need to:

1. Add tests
2. Add an icon to JS toolbar
3. Allow clicking task item checkboxes directly.
4. Try to add this to Textile

From my point of view, the feature is useful enough only with the first 2 items and we can improve later with 3 and 4. What do you think?

Regarding the tech side, I tried to implement it using only the tasklist extension provided by the CommonMark, but it requires to whitelist in the sanitize the following tags: ul, li, input type="checkbox". Also, using this extensions it will make harder to port this feature to textile.

#3 - 2021-10-03 22:12 - Marius BALTEANU

- Target version set to 5.0.0

I think we should deliver this along with the new CommonMark formatter. Any feedback is appreciated.

#4 - 2021-10-09 10:28 - Go MAEDA

- File Screenshot_2021-10-09_at_17-25-08.png added

Really nice feature. This should be delivered in Redmine 5.0.0.

I agree. I think it is still useful even without 2.
