Resolution:			
<b>Description</b>			
In the light of major version cleanups and refactorings, combined with <a href="#">#15180</a> and <a href="#">#35760</a> (and maybe even <a href="#">#35761</a> and <a href="#">#35762</a> ), it might be a good idea to deprecate and finally remove the Version#effective_date compatibility layer in favor of Version#due_date altogether.
