

Redmine - Defect #35794

ProjectQuery doesn't obey multiple sort orders

2021-08-22 04:06 - Mischa The Evil

Status: New	Start date:
Priority: Normal	Due date:
Assignee:	% Done: 0%
Category: Projects	Estimated time: 0.00 hour
Target version:	Affected version:
Resolution:	
Description	
<p>While the new/edit ProjectQuery form supports setting a secondary and tertiary sort clause, these project custom query settings are not obeyed when rendering the projects index view as a list.</p> <p>The above is equally true for non-persistent ProjectQuery sorting. In contrast to IssueQuery, when sorting by a column is requested (by clicking the column header), the previous sort clause isn't preserved and re-used.</p> <p>Behavior is observed on Redmine trunk at r21194.</p> <p>I haven't looked into this and I'm not certain if it's a defect or a not-yet implemented feature.</p>
