**Description**

I am not able to ADFS Integration on Redmine

## History

**#1 - 2021-09-20 16:40 - Holger Just**

*- Category changed from Custom fields to Accounts / authentication*

*- Status changed from New to Needs feedback*

Please decribe in more detail the exact difficulties you are facing. Please describe what exactly:

- what you are trying to do
- what exactly you have done so far to implement this
- the expected results of your attempts so far
- how exactly the results differ from those expected results. Here, it's always helpful to show verbatim errors.
