

## Redmine - Defect #35965

### REST group api does not work when user is already member of group

2021-10-08 11:33 - Wim Bertels

<b>Status:</b>	New	<b>Start date:</b>

<b>Category:</b>	REST API	<b>Estimated time:</b>	0.00 hour
<b>Target version:</b>		<b>Affected version:</b>	4.0.7
<b>Resolution:</b>			
<b>Description</b>			
<p>This might be related to: <a href="https://stackoverflow.com/questions/56767239/how-to-fix-user-is-invalid-error-when-adding-user-to-a-group-with-redmine-api">https://stackoverflow.com/questions/56767239/how-to-fix-user-is-invalid-error-when-adding-user-to-a-group-with-redmine-api</a></p> <p>How to reproduce:</p> <ol style="list-style-type: none"><li>1. add a user U1 to group G1 via the redmine admin panel</li><li>2. add the same user U1 to the group G1 with a (curl) api request</li></ol> <p>the following errors are thrown:</p> <pre>\$ curl -i -H "Content-Type: application/json" -X POST --data '{"user_id":1234}' -H "X-Redmine-API-Key: secret" https://myredmi.ne/groups/1/users.json</pre> <p>HTTP/1.1 422 Unprocessable Entity Date: Fri, 08 Oct 2021 09:13:04 GMT Server: Apache Cache-Control: no-cache Referrer-Policy: strict-origin-when-cross-origin X-Permitted-Cross-Domain-Policies: none X-XSS-Protection: 1; mode=block X-Request-Id: 5b6c0feb-2051-41b0-bb27-5227f558d708 X-Download-Options: noopen X-Runtime: 0.007623 X-Frame-Options: SAMEORIGIN X-Content-Type-Options: nosniff X-Powered-By: Phusion Passenger 5.0.30 Strict-Transport-Security: max-age=31536000; includeSubDomains Status: 422 Unprocessable Entity Transfer-Encoding: chunked Content-Type: application/json; charset=utf-8</p> <pre>{"errors":["User is invalid"]}</pre>			
<p>the user is not invalid, but already part of the group.</p> <p>--</p> <p>i would prefer a behaviour where the user is added the group again, as in the background this invokes other operations, namely on members and member_roles.</p> <p>more precise:</p>			

- a group G1 has access to project P1
- when a user U1 gets added to the group G1, in the background this user gets added project P1 (*inherited* from G1)
- when the user is removed from G1, it is also removed from P1 (as found through *inherited*)

i have noticed that sometimes, (not often,) this process does not complete, so users might get added to a group, but not to the projects of the group, adding them again to the group should fix the problem, but the api does not allow that,

if the api would allow that, then this would possible 'self-heal' the rare cases in which the users where not added to projects properly

--

workaround: first remove group, and add again; for example

- curl -i -X DELETE -H "X-Redmine-API-Key: secret" <https://redmi.ne/groups/1/users/1234.xml>
- curl -i -H "Content-Type: application/json" -X POST --data '{"user\_id":1234}' -H "X-Redmine-API-Key: secret"

<https://myredmi.ne/groups/1/users.json>

(ps: delete seems only to work with xml)
