Description Add search capabilities in a list custom-field when it is displayed as a drop-down list and also when it is displayed as checkboxes. This can improve the UX when a custom-field as hundreds or thousands of items. At this moment I need to scrool the entire list of items. Thanks.			

History

#1 - 2021-10-18 10:29 - pasquale [:dedalus]

It refers to the case in which the selection of multiple values is activated in the list.
