Redmine - Feature #3617

Selecting wiki page parent from a list

2009-07-15 18:11 - Basil Gren

Target version:				
Resolution:	Duplicate			

Description
It would be gereat to have opportunity to select a parent for wiki page from the list of existing wiki-pages instead of typing a title of desired parent page. In any case setting parent to a non-existant page is restricted, and it's so easy to forget or misspell title of parent page you want to use.
