

Redmine - Defect #36318

Saving time tracking activities without any change may turn a system activity into a project activity

2021-12-15 02:53 - Yuichi HARADA

Status:	Closed	Start date:	
Priority:	Normal	Due date:	
Assignee:	Go MAEDA	% Done:	0%
Category:	Project settings	Estimated time:	0.00 hour
Target version:	5.0.0	Affected version:	
Resolution:	Fixed		
Description			
If you save system activities without editing them in the project settings, some activities will be created as project-specific activities.

Could you explain the conditions that cause this issue?

#3 - 2021-12-15 05:49 - Go MAEDA

Go MAEDA wrote:

Could you explain the conditions that cause this issue?

I understand the condition.

The issue occurs when the value of a custom field of the activity is nil, and the new value for the custom field in the "new" hash is unset (the value will be a blank string). As a result, the conditional expression of the if statement will be false and a project-specific activity will be wrongly created.

#4 - 2021-12-15 06:30 - Go MAEDA

- Status changed from New to Confirmed

- Target version set to 4.1.6

Setting the target version to 4.1.6.

#5 - 2021-12-15 07:56 - Yuichi HARADA

- File 36318-v2.patch added

I forgot to fix test/unit/time_entry_activity_test.rb. Reattached the patch.

#6 - 2021-12-21 06:47 - Go MAEDA

- Subject changed from *Some system activities are created as project-specific activities when there are custom fields for activities to Saving time tracking activities without any change may turn a system activity to a project activity*

#7 - 2021-12-21 07:43 - Go MAEDA

- Subject changed from *Saving time tracking activities without any change may turn a system activity to a project activity to Saving time tracking activities without any change may turn a system activity into a project activity*

- Status changed from *Confirmed* to *Closed*

- Assignee set to *Go MAEDA*

- Target version changed from *4.1.6* to *5.0.0*

- Resolution set to *Fixed*

Committed the fix. Thank you.
