

Redmine - Defect #36515

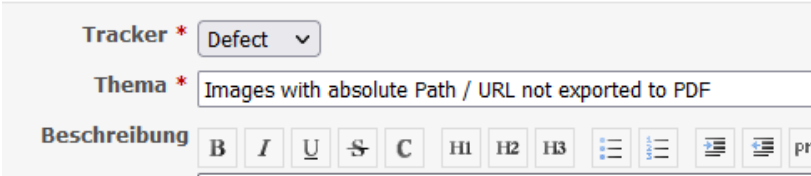

Images with absolute Path / URL not exported to PDF

2022-01-25 07:14 - Malte Blanck

Status:	New	Start date:	
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	PDF export	Estimated time:	0.00 hour
Target version:		Affected version:	4.2.3
Resolution:			

Description

Images get exported to PDF (From Wiki / Ticket)

If you use the syntax with the complete Image URL the Image doesn't appear on the PDF.

History

#1 - 2022-01-25 07:15 - Malte Blanck

This one won't work:

```
image.png  
!https://www.redmine.org/attachments/download/28741/image.png!
```

It appears though, that in Redmine.org Images are generally not exported to PDF.

#2 - 2022-01-25 07:39 - Alexander Meindl

I can confirm this problem for pdf export.

This works for html output and pdf export:

```
!image.png!
```

This works for html output, but not for pdf export:

```
!https://myredmine.com/attachments/download/28741/image.png!
```

I suppose the problem is that [rbpdf](#) cannot access to these files. Wysiwyg editors like [redmine_wysiwyg_editor](#) insert absolute URLs (it would be nice, if they would insert relative urls).

But I think, that html and pdf output should be the same in general.

Tested with:

- Redmine 4.2.3
- Ruby 2.7.5
- No plugins

#3 - 2022-02-28 23:03 - Marius BĂLTEANU

Is it working when the attachment is public?

#4 - 2022-03-02 23:53 - Malte Blanck

- File *Export_test.pdf* added

Is it working when the attachment is public?

Nope, same issue...

But I am not 100% sure wether or not i set the Project completly Public.
I just toogled the "public" Checkbox on the Projects Configuration page.
