

Redmine - Defect #36542

projects.xml API doesn't include closed projects since redmine v4.1

2022-01-28 12:40 - Christoph Klaffl

| Description Before redmine v4.1 the /projects.xml API returned active and closed projects. With v4.1 and upwards only active projects are returned and there isn't an option to include them (as far as I can read from the corresponding src file). It seems the change happened with this commit: https://github.com/redmine/redmine/commit/6c5440a21b491982c02531c82b4416ef212eb3dc | | | |

I have described three ways to get information about status closed (id: 5). Could you please try with this?

- Save a custom query configured to include the closed project and set its query. `http://<Redmine url>/projects?query_id=<query id>&key=<API key>`
- `http://<Redmine url>/projects.xml?f[]=status&op[status]==&v[status][]=1&v[status][]=5&key=<API key>`
- `http://<Redmine url>/projects.xml?status=5&key=<API key>` results(closed projects) + `http://<Redmine url>/projects.xml?status=1&key=<API key>` results(open projects)

There is a workaround, but I think the problem that the document([Rest Projects](#)) is not updated even though the specifications of the project API have changed significantly needs to be improved.

- Add a method for adding filter conditions
- Add a description that previously included projects that were closed by default, but are no longer included

#2 - 2022-02-10 10:14 - Christoph Klaffl

Using

```
https://<Redmine url>/projects.xml?f[]=status&op[status]==&v[status][]=1&v[status][]=5&key=<API key>
```

works. Thank you!

You can also override the default status filter with an empty filter value to get a list of all projects (open, closed or archived):

```
GET /projects.xml?status=
```

To get only open or closed projects, you can also use the following short filter to get open projects (status = 1) or closed projects (status = 5):

```
GET /projects.xml?status=1|5
```

#5 - 2022-10-02 09:56 - Marius BĂLTEANU

- Status changed from New to Closed

- Resolution set to Fixed
