

Redmine - Defect #36574

context-menu on task

2022-02-04 12:21 - Brice Beamesnil

Status:	Closed	Start date:	
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	UI	Estimated time:	0.00 hour
Target version:		Affected version:	4.2.3
Resolution:	Invalid		
Description			
Hello,			
context-menu on right click on roadmap's or issues's page can be display in wrong place on Firefox browser (no problem on Chrome).			
It's just because the div context-menu is append on content's div			
On context-menu.js			
<pre>document.getElementById("content").appendChild(menu);</pre>			
need to be change. For example :			
<pre>document.getElementById("footer").parentElement.appendChild(menu);</pre>			
But it's need to be append to a full page DIV.			
Thanks			

History

#1 - 2022-02-04 13:12 - Brice Beamesnil

It's linked to the theme used (we use PurpleMine)

And they add this code :

```
// Fix issue with context menu position
if (this.$main.css('position') === 'relative') {
  $(window).on('load', function () {
    $('#context-menu').appendTo('#wrapper3')
  })
}
```

It's work on Chrome but not on Firefox.

#2 - 2022-02-10 06:36 - Mizuki ISHIKAWA

I have also seen in the past how the context menu was misplaced.

I just opened the roadmap page and the issues page in Firefox to see how it works, and I was able to open them in the context menu without any problems. Do you know of any other conditions that might reproduce the problem?

Since I don't know the conditions under which the problem occurs, I can't confirm that the code works.

#3 - 2022-02-10 08:34 - Guillermo ML

Could be related to [Graphical bug with redmine 4.2.3](#) ?

We use PurpleMine2 with redmine 4.1.X and couldn't reproduce the error.

#4 - 2022-02-24 13:53 - Brice Beamesnil

Yes i think it's related to this bug (i'm on redmine 4.2.4)

#5 - 2022-10-02 09:57 - Marius BĂLTEANU

- Status changed from New to Closed
- Resolution set to Invalid
