+1

Thanks for reporting the problem and for sharing the code.

I was able to reproduce the problem.

Here are the steps to reproduce the problem.

- bundle exec rake db:fixtures:load
- Log in as admin user
- Custom fields » Projects » New custom field

- required
- to these roles only: Manager
- Log in as jsmith user
- New project => save
- The error message "Test cannot be blank" is displayed.

In <https://github.com/redmine/redmine/pull/135> , a pull request is proposed to skip the validation of required custom fields when a user who does not have permission to see them tries to create a project.

The same mechanism is already implemented in Issue, so I think it's good to add this pull request code to Redmine.
