Please see my comment from message#58521:

In the latest Redmine versions you can :

- *drag images onto the droppable zone in order to be uploaded*
- *drag images onto the text area in order to be uploaded and embedded*

In version version:"4.1.0" you can copy paste your image into text area in order to be uploaded and embedded

You can see #31169 and the related issues.

If still doesn't work, we need the steps to reproduce the issue.

I recorded my operation for reproduce as a GIF

first step: copy a image use ctrl+c

second step: press ctrl+v onto the text area of wiki it's works

third step: press ctrl+v onto the text area of issues it's works

fourth step: press ctrl+v onto the text area of documents, it doesn't work. i try drag images onto the text area of documents, it's still doesn't work

I think it would be better to backport the fix because the should-be available feature is not available and the change is quite small.

I found the same issue with Ctrl + V doesn't work. which Redmine version I can download and install with this issue fixed?

Thanks!

Also email can't be dragged into the issue anymore with the same build.

Environment:

Redmine version 4.2.3.stable
Ruby version 2.6.8-p205 (2021-07-07) [x64-mingw32]
Rails version 5.2.6
Environment production
Database adapter Mysql2
Mailer queue ActiveJob::QueueAdapters::AsyncAdapter
Mailer delivery smtp

SCM:

Git 2.34.0
Filesystem

Redmine plugins:

redmine_agile 1.6.2

Ctrl + V works in Chrome. Not Edge.

Whether it is browser related.
