Category:	Estimated time: 0.00 hour
Target version:	Affected version: 4.2.5
Resolution: Invalid	

Description

I have two errors on manual render details via IssuesHelper.details_to_strings

First on render attachments changes in issue:

```
2: from /usr/src/redmine/app/helpers/issues_helper.rb:494:in `block in details_to_strings'
1: from /usr/src/redmine/app/helpers/issues_helper.rb:602:in `show_detail'
/usr/src/redmine/app/helpers/application_helper.rb:126:in `link_to_attachment': undefined method `attachment_url' for
#<#<Class:0x0000558479c80de0>:0x0000558479c80ae8> (NoMethodError)
```

Second on render custom field(type=text) changes:

```
1: from /usr/src/redmine/app/helpers/issues_helper.rb:494:in `block in details_to_strings'
/usr/src/redmine/app/helpers/issues_helper.rb:620:in `show_detail': undefined method `diff_journal_url' for
#<#<Class:0x00005644a8e5db28>:0x00005644a8e5ca70> (NoMethodError)
```

Methods attachment_url and diff_journal_url not found in redmine github repo

History

#1 - 2022-04-19 17:42 - Holger Just

- Status changed from New to Needs feedback

Both the attachment_url and diff_journal_url methods are dynamically created based on Redmine's URL routing rules to create the full URL to a object. Both of these methods should be available in every rendering context (i.e. within controllers, views and helpers).

To be able to find what went wrong here, it is however required that you show the full stack trace of the error. Please also make sure to run Redmine in production mode by setting RAILS_ENV=production and restart your Redmine application server after any change to Redmine's code, any plugin or configuration files on your server.

#2 - 2022-04-22 08:48 - VITALIY SAVCHENKO

I use docker image.

issues2chat.rb - script that run via cmd

```
ruby ./scripts/issues2chat.rb
```

issues2chat.rb looks like

```
require "/usr/src/redmine/config/environment"
```

```
puts ENV["RAILS_ENV"] // print production
```

```
...
```

```
helper = Class.new.send(:include, IssuesHelper, ActionView::Helpers::TagHelper, ERB::Util, Redmine::I18n).ne
w
```

```
helper.set_language_if_valid('ru')
description_text = helper.details_to_strings(journal.details).join("<br />") + "<br />" + description_text /
/ line 54
```

```
...
```

```
5: from ./scripts/issues2chat.rb:54:in `block in <main>'
```

```
4: from /usr/src/redmine/app/helpers/issues_helper.rb:480:in `details_to_strings'
```

```
3: from /usr/local/bundle/gems/activerecord-5.2.6.3/lib/active_record/relation/delegation.rb:71:in `ea
```

```
ch'
  2: from /usr/local/bundle/gems/activerecord-5.2.6.3/lib/active_record/relation/delegation.rb:71:in `ea
ch'
  1: from /usr/src/redmine/app/helpers/issues_helper.rb:494:in `block in details_to_strings'
/usr/src/redmine/app/helpers/issues_helper.rb:620:in `show_detail': undefined method `diff_journal_url' for #<
#<Class:0x0000562d0f37e640>:0x0000562d0f37e348> (NoMethodError)
```

#3 - 2022-05-04 10:48 - Go MAEDA

I think this is a problem with your issues2chat.rb, not with Redmine itself. Please use [forums](#) for questions.

#4 - 2022-05-08 12:18 - VITALIY SAVCHENKO

I can't find where these methods are defined

#5 - 2022-05-08 14:59 - VITALIY SAVCHENKO

Resolved by define_method in script.

```
define_method(:diff_journal_url)...
define_method(:attachment_url)...
```

Can be closed

#6 - 2022-05-09 03:14 - Go MAEDA

- *Status changed from Needs feedback to Closed*

- *Resolution set to Invalid*

Thank you for your feedback. Closing.
