

Redmine - Feature #37077

"Unifying" core/custom field logic

Description	
<p>As pointed out in #12005, the schism between "core" fields and custom fields, is quite a pain in the neck, when trying to apply plugin logic to all fields.</p> <p>I have created this issue in the hopes that the Redmine dev team, would consider unifying the logic behind core and custom fields, to facilitate plugin development targeting fields, whether they be custom or "core".</p>
