##### Revision 22893 - 2024-06-22 09:35 - Go MAEDA

Update locales (#37279).

#### History

##### #2 - 2022-07-09 09:08 - Go MAEDA

- File 37279.patch added

The attached patch adds User#test\_validate\_password\_complexity. It rejects passwords that are the same as the user's login, first name, last name, or email for now. I think it would be great if the method is extended to also reject passwords with dictionary words in the future.
