

Redmine - Defect #3734

fetch_changesets save local time instead of GMT in the database.

2009-08-13 22:55 - Aleksej Lebedev

Status:	Needs feedback	Start date:	2009-08-13
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	SCM	Estimated time:	0.00 hour
Target version:		Affected version:	
Resolution:			
Description			
<p>At saving commits in a database, time of each of them will be converted in the local time and in this form will be retained in the database. When you browse the repository the commits time will be displayed incorrectly, because will be re-converted in the local time...</p>			
Patch to correct this:

- Status changed from New to Needs feedback

Any news on this?

Can someone confirm this defect in the current trunk?
