Description

Hi everyone;
I would like to request a custom fields sorting / overview. In the mean time, we have too many of them (and yes - we need them all :)
) and it is really hard as administrator to have an overview.
(administration section - custom fields - list of custom fields)
Are there any patches out there, which will allow a better sorting? Not only up and down. For example group fields to the projects, where they are used.
Thanks everyone for contributing to Redmine.
Martina
