

Redmine - Defect #3753

Plugin asset URLs not correctly generated for sub-URI deployments

2009-08-18 15:18 - John Koleszar

Status:	Closed	Start date:	2009-08-18
Priority:	Normal	Due date:	
Assignee:	Eric Davis	% Done:	0%
Category:	Plugin API	Estimated time:	0.00 hour
Target version:		Affected version:	
Resolution:	Duplicate		
Description			
<p>When Redmine is installed in a sub-uri (eg www.example.org/redmine), the URLs generated for plugin assets do not prepend the <code>relative_url_root</code>. Strictly speaking, this is a bug in the Engines plugin, not Redmine, but there has been no response to my report on the Engines developers' list¹.</p> <p>[1] http://lists.rails-engines.org/pipermail/engine-developers-rails-engines.org/2009-August/000344.html</p>

History

#1 - 2009-09-01 05:25 - Eric Davis

When Redmine is upgraded for Rails 2.3.3 (#3597), we'll probably need to upgrade Engines also. If the bug still exists, I can try to fix it for Redmine and send it to the Engines team.

#2 - 2010-09-17 06:23 - Eric Davis

- Status changed from New to Closed
- Resolution set to Duplicate

Was fixed in #3935, marking this as a duplicate.
