

## Redmine - Defect #37676

### Image base64 are not displayed

2022-09-14 11:51 - Black Zajaz

<b>Status:</b>	Closed	<b>Start date:</b>	
<b>Priority:</b>	Normal	<b>Due date:</b>	
<b>Assignee:</b>		<b>% Done:</b>	0%
<b>Category:</b>		<b>Estimated time:</b>	0.00 hour
<b>Target version:</b>		<b>Affected version:</b>	5.0.2
<b>Resolution:</b>	Invalid		
<b>Description</b>			
After upgrade from 4.1.1 to 5.0.2 Images are not displayed.			
Into Database are saved with html base64 code			
<pre>&lt;img alt="" src="...." /&gt;</pre>			
but this is not displayed into HTML.			
<pre>&lt;img alt="" height="397" width="701"&gt;</pre>			
Why is source text not read?			

#### History

##### #1 - 2022-09-14 16:34 - Black Zajaz

I'm need a workaround.

I have pictures from issues and wikis of last 10 years.

Anyone have an idea?

##### #2 - 2022-09-15 04:45 - Go MAEDA

- Status changed from New to Needs feedback

Redmine core does not have a feature to embed an image using an img tag with base64 data. Probably it is a feature added by some plugin, isn't it?

I recommend you to contact the author of the plugin.

##### #3 - 2022-09-15 08:01 - Black Zajaz

I have contacted owner from ckeditor plugin.

Here is answer:

[https://github.com/a-ono/redmine\\_ckeditor/issues/349#issuecomment-1156472120](https://github.com/a-ono/redmine_ckeditor/issues/349#issuecomment-1156472120)

:(

##### #4 - 2022-09-15 08:32 - Go MAEDA

- Status changed from Needs feedback to Closed

- Resolution set to Invalid

Unfortunately there is nothing we can do about the plugin.

##### #5 - 2022-09-15 08:53 - Black Zajaz

- Status changed from Closed to Reopened

i don't want to use plugin, i just want support.

I look for alternatives.

**#6 - 2022-09-15 09:21 - Go MAEDA**

Since the problem is caused by a third-party plugin, it is not appropriate to open an issue here. Please use [forums](#) for asking for help.

If you need support for CK Editor plugin, maybe you can contact the RedmineX team.

<https://www.redmine-x.com/redmine-x-plugins/roadmap/ck-editor-take-over>

**#7 - 2022-09-15 09:26 - C S**

Do you still have CK Editor installed?

Which text formatter did you choose?

Currently the best solution: Common Markdown (~95% of the CK-Editor HTML code is translated by us)

**#8 - 2022-09-15 12:43 - Black Zajaz**

Thank, for answer.

But, i don't want to use plugin.

I'm need a workaround for convert pictures or a path for use base64 data.

You can close this issue.

:(
