Description
Hello. In Redmine 4 one could upload an attachment and use its file name in a thumbnail-macro in all issue comments (aka notes, aka journal). With version 5 the thumbnail is shown only in the comment, with which an image was uploaded, and if one reuses the macro code in other comments, then an error is shown "Error executing the thumbnail macro (test.jpg not found)"

- Status changed from New to Confirmed

Confirmed the issue.

The macro {{thumbnail}} works only if the image is attached to the same journal where the macro is embedded. In the following screenshot, {{thumbnail(IMG_6964.JPG)}} works in note-3 but does not in note-4.

This issue looks similar to #37379.
