

Redmine - Feature #3790

extend child_page macro to specify number of levels

2009-08-28 05:27 - jon hertzig

Status:	Closed	Start date:	2009-08-28
Priority:	Normal	Due date:	2013-04-25
Assignee:		% Done:	0%

Target version:			
Resolution:	No feedback		
Description			
The child_page macro only seems to go 3 levels deep, that is, it shows the hierarchy down to three levels (eg, 1, 1.1., 1.1.1)			
It would be really nice to include a parameter that lets you specify how deep it should go....			

History

#1 - 2013-04-10 18:45 - Dipan Mehta

As of this page <http://www.redmine.org/projects/redmine/wiki/RedmineTextFormatting> - the above is now possible.

```
!{{child_pages}} -- can be used from a wiki page only
!{{child_pages(depth=2)}} -- display 2 levels nesting only
```

Can we close this issue?
