

Redmine - Patch #37938

Unused permission "Mention user"

2022-11-16 15:15 - Go MAEDA

Status:	Closed	Start date:	
Priority:	Normal	Due date:	
Assignee:	Mariusus BĂLTEANU	% Done:	0%
Category:	Code cleanup/refactoring	Estimated time:	0.00 hour
Target version:	5.0.4		
Description			
In Permissions and Roles, you can find "Mention users" permission. However, this permission is not used at all. You can mention a user even if you don't have "Mention users" permission.			
I think this unused "Mention users" permission should be removed.

- Related to Feature #13919: Mention user on issues and wiki pages using @user with autocomplete added

#2 - 2022-11-16 15:31 - Holger Just

This appears to be a remaining artifact of the discussion around [#13919#note-75](#). The permission indeed appears to be unused now and can be removed.

However, I'm wondering if we need to actually remove it from any roles which might have this permission defined now? Or if we could just not care?

#3 - 2022-11-28 23:54 - Mariusus BĂLTEANU

- Assignee set to Mariusus BĂLTEANU

- Target version set to 5.0.4

#4 - 2022-11-28 23:56 - Mariusus BĂLTEANU

- Status changed from New to Resolved

I've removed the permission and I've added an issue ([#37974](#)) to [5.1.0](#) to cleanup the permission from the database.
