

Redmine - Defect #37986

postgresql 15: additional steps required while initializing database

2022-12-01 13:35 - Tomas D

Status:	New	Start date:	
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	Documentation	Estimated time:	0.00 hour
Target version:		Affected version:	5.0.3
Resolution:			
Description			
<p>I tried to install on alpine/edge with clean postgresql 15 setup. Errors were produced while initializing database:</p> <pre>prod1:~/redmine\$ RAILS_ENV=production bundle exec rake db:migrate rake aborted! ActiveRecord::StatementInvalid: PG::InsufficientPrivilege: ERROR: permission denied for schema public LINE 1: CREATE TABLE "schema_migrations" ("version" character varyin...</pre> <p>While following installation step 2 (https://www.redmine.org/projects/redmine/wiki/RedmineInstall#PostgreSQL), I had to use additional commands in postgresql:</p> <pre>\c redmine postgres grant all on schema public to redmine</pre> <p>source: https://www.cybertec-postgresql.com/en/error-permission-denied-schema-public/</p> <p>Only then</p> <pre>RAILS_ENV=production bundle exec rake db:migrate</pre> <p>worked as expected.</p>
