Target version:			
Resolution:			

Description

In many cases, the person who originates an issue does not know who should be assigned to handle it. But they can make a good guess at the Category. It would be nice if we could associate a user with each Category, so new issues in that Category would be assigned to that user.

Thanks for a great open source project!

This feature can be usefull indeed.
It's done and committed in rev 577.

Thanks
