Target version:	5.1.0		
Resolution:	Fixed		
Description There are some cases for which the MailHandler drops incoming emails and just logs an info. This patch replaces this with a custom error to allow for plugins to more easily hook into those unhandled cases. This also unifies the logged message and the error handling in MailHandler.

History

#1 - 2023-02-13 15:42 - Felix Schäfer

- File 1-missing_container_error.patch added
- File 2-locked_topic_error.patch added

The attached patch adds a custom generic Error for cases when the replied to object/the container object cannot be found, either because it was deleted or because the e-mail comes from another Redmine installation with different IDs. The second patch adds a custom Error for cases where the topic the e-mail answers to is locked.
