

Redmine - Patch #38278

Basename of repository and Branch/Tags in Changeset Description

2023-02-16 17:47 - Niklaus Giger

Status:	New	Start date:	
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	UI	Estimated time:	0.00 hour
Target version:			
Description			
<p>Our development team uses branches pretty thoroughly. Therefore we are running for a few years a patched version for redmine which improves the display of a revision in order to ease the review of patches.</p> <ul style="list-style-type: none">• Show basename of associated repository (often our issues require changes in several repositories)• Show a link to the associated revision• Show a link to the associated diff <p>I invested 2 hours to add a test for the attached patch, but was not successfull. If anybody gives me a hint about howto proceed, I am willing to invest some more time, as it is always a good idea to test the changes.</p> <p>Running `RAILS_ENV=test bundle exec rake test:scm:functionals` results in `159 runs, 844 assertions, 26 failures, 0 errors, 0 skips`, but is about the same as running the master branch.</p> <p>A similar issue was raised in https://www.redmine.org/issues/5386, but I never got any reponse to my patches supplied there.</p>			

History

#1 - 2023-02-17 17:33 - Niklaus Giger
- File `improve_display_revision.patch` added

#2 - 2023-04-30 22:51 - Marco Descher
+1 for integration of this feature
