

Redmine - Feature #3856

show userpage by 'login' rather than 'id'.

Description sometimes I need more human readable URL for my redmine account. for example, http://www.redmine.org/account/show/5263 (currently) vs. http://www.redmine.org/account/show/sio4 (meet 404 page) how about this? and one more step forward, more fency version is, http://www.redmine.org/u/sio4 If redmine is used for development portal or something like *forge, it will be very useful function. (and I can write this URL on my blogs. "hey, I contributed on great open source project called redmine, here is my page! http://www.redmine.org/u/sio4 ") ...and here is a quick and dirty patch. I think this is a nice idea. Though some may want to the other way - may be even if you allow both format of the access might be nice.

#2 - 2016-04-07 17:53 - Yonghwan SO

- File user-page.patch added

Is there someone interesting in this feature?

I updated this patch for current version of redmine.

check it please...

for now,

the original URL for user page is:
<http://www.redmine.org/users/5263>

additional/suggested URL for user page is:
<http://www.redmine.org/users/sio4>
or <http://www.redmine.org/u/sio4>
