<b>Description</b> Tried to create a query that used a due date filter. I set it to is less than 365 days from now - that missed all of the issues with blank Due Dates. The filter does not allow you to specify a blank due date, or allow you to do multiple selections (due date < 365 days AND due date is blank). This appears to be the same for the Start Date as well.

I missed this function, too. It would be very helpful to filter Tickets that are e.g. status new, a week old and without due date. It would be great if you can integrate this feature in the next release. Thanks.

- Subject changed from Due date and Start date filters don't allow you to specify multiple selections OR blank to Start- & Due date issuelist filters: allow to specify multiple selections (e.g. x OR blank)

I believe these issues did not exactly proposed what Robert Chady described here. This issue deals with having a possibility of having multiple selections for issuelist start-/end date filters, for example including a 'blank' value.

I've adjusted the issue-subject and will "fix" the issue-relations accordingly.
