Redmine - Feature #39003

Add css class to external links in markdown

2023-08-31 09:29 - Ulf Seltmann

Resolution:	Wont fix			

Description

Appearently there is no identifier added to external links when the renderer for wiki and tickets is markdown. Therefore plugins that add the ability to open external links in a new window cannot distinguish external from internal links.

Please modify the markdown filter to add a class "external" to all external links.

History

#1 - 2023-08-31 10:36 - Go MAEDA

- Status changed from New to Closed

- Resolution set to Wont fix

Please use the new "CommonMark Markdown" added in Redmine 5.0.0 (#32424) instead of the old "Markdown" formatter. The former correctly adds the "external" class to external links.

"Markdown" will be removed in the near future (See #36807).
