Resolution:			**Affected version:**	5.1.0

Description

When i try select parent issue - redmine filter parent lissue list same state as current issue.
If current issue closed - list only closed issues in parent list
if current issue open - list only open.

looks not good. I want set parent any parent ticket.

Yeah, maybe attaching opened child ticked to closed parent ticket - bad, i agree, but attaching closed child ticket to opened parent - looks fair.
