<b>Description</b>			
Git commit - time log and issue link			
After <b>committing</b> in git repo, which is added as Repository in Redmine project I have strange behaviour.			
First - link of commit to the issue <b>is not showing up</b> until someone <b>clicks</b> on Repository page on exactly that one git repo.			
After commit is linked to the issue, * time is not logged* on that issue <b>immediately</b> . It is logged on some random time in <b>future</b> (after 2 days for example).			
Does anyone have similar behaviour?
