

Redmine - Defect #39876

H4 author headings aren't bold any more

Target version:		Affected version:	4.0.0
Resolution:			
Description			
<p>Prior to Redmine 4.0.0, H4 author headings in e.g. issue history, news comments and forum topics were rendered with font-weight bold by deferring the property to the user-agent style. As a (side-)effect of #22978, this is no longer the case and I don't like that.</p> <p>IMHO author headings should stand out from actual content more than they currently do and as such deserve to be rendered with font-weight bold.</p>
